EXPERIENCE

Onward Development / Florida, USA / Contract Ruby on Rails Developer 06/2024 - 09/2024

- Initiated, planned, and executed the development of a live video conferencing platform for doctors and patients to meet and consult within a medical pharmacy app.
- Helmed multiple security efforts: designed and developed authentication and SMS.
- Managed server infrastructure using AWS.

Dashcam.io / Texas, USA / Software Developer 06/2022 - 04/2023

- Contributed to code repositories and tools for an emerging startup.
- Authored articles and actively interacted within developer communities.

Post-PC Labs / California, USA / Team Lead & Senior Software Engineer 01/2020 - 06/2021

- Led the development of a comprehensive Q&A application based on **Rails, Vue, GraphQL**.
- Managed a cross-functional (product, engineering, sales, support) team and coordinated with business partners toward the successful launch of a Q&A polling platform.
- Oversaw system design, developed new features, refactored existing code, and participated in code review sessions.

Flux Inc / Toronto, Canada / Ruby on Rails Developer 06/2017 - 03/2019

- Collaborated on multiple software projects based on **Rails, Vue, and Angular** to support organizational objectives.
- Developed applications from inception to deployment, integrating architectural changes to enhance functionality and user experience.

Custom Tattoo Design / Toronto, Canada / Ruby on Rails Engineer 06/2017 - 02/2018

- Designed and developed key CRM features including evaluation and payment systems, and an advanced live chat feature.
