## SKILLS

- Languages: Ruby, Javascript, SQL, Python
  - Tools: Ruby on Rails, Stimulus, Vue.js, Angular, RSpec, Capybara, Bootstrap
  - Systems: PostgreSQL, GraphQL, Amazon Web Services (AWS), Docker
  - Roles: Tech Lead, Devops, Frontend, Backend, Full-Stack
- 

## EXPERIENCE

**Onward Development** / Florida, USA / Contract Ruby on Rails Developer 06/2024 - 09/2024

- Initiated, planned, and executed the development of a live video conferencing platform for doctors and patients to meet and consult within a medical pharmacy app.
- Designed and implemented robust security measures, including phone and SMS verification, which reduced potential security risks by **60%** during internal evaluations.
- Optimized AWS server infrastructure, achieving a **99.8% uptime** and reducing load times by **25%** through targeted performance enhancements.

**Dashcam.io** / Texas, USA / Software Developer 06/2022 - 04/2023

- Contributed to **20+** code repositories and tools for an emerging startup.
- Authored technical articles and engaged with developer communities, expanding the company's online presence by **40%**.

**Post-PC Labs** / California, USA / Team Lead & Senior Software Engineer 01/2020 - 06/2021

- Led a cross-functional team of **8+ members** in developing a comprehensive Q&A platform based on **Rails, Vue** and **GraphQL**.
- Refactored legacy code and improved agile methodologies, which increased development efficiency by **65%** and boosted app performance by **90%**.
- Mentored 2 engineers over 8 months; and created a coding guideline that cut the team's PR session time in half.

**Flux Inc** / Toronto, Canada / Ruby on Rails Developer 06/2017 - 03/2019

- Collaborated on **5+** software projects based on **Rails, Vue**, and **Angular** to support organizational objectives.
- Developed applications from inception to deployment, integrating architectural changes to enhance functionality and user experience.

**Custom Tattoo Design** / Toronto, Canada / Ruby on Rails Engineer 06/2017 - 02/2018

- Designed and developed key CRM features—including an evaluation and payment system and an advanced live chat feature—that supported over **1000+ monthly customers**.
  - Wrote more than **200 unit tests** with **Rspec** and **Capybara** to ensure robust code quality, resulting in a **90%** app coverage.
- 

## OTHER PROJECTS

**SHA256 Everything** - a Ruby gem for hashing everything in a folder.

**Arch Secure** - a Python program for securing an Arch Linux system.
